BTEC Computing

The following is a list of activities you may like to do during your summer holidays, in preparation for studying BTEC Computing.

Do not be put off if some of this looks a bit tricky – we teach from the absolute beginning. You do not need to have done any programming before, but that does not stop you from having a try before you come to the college.

We will be programming in C#, using a program called Visual Studio. You can download it from here (We have the 'Community' edition at College):

<https://www.visualstudio.com/>

There are plenty of tutorials online, found easily by searching for 'C# Visual Studio Tutorials'. Here are a few to start with:

<https://www.learncs.org/> (click on the C# bit up the top)

or

<http://www.homeandlearn.co.uk/csharp/csharp.html>

There is more news released about developing technologies every day. Keep up to date with the excellent new stories and infographics about developing technologies.
