

Some of the young women involved in our new Women in STEM tutorials

Community Spirit

Welcome to the December edition of On Route, Reigate College's termly newsletter, that gives current and prospective students and their families, the chance to catch up on some of the news and developments from across the College community.

Anyone who's spent any time on campus recently, will be aware of the huge building project that's currently underway. The interview on pages 4 and 5, with the College's Director of Estates and IT Garry Holmes, explains the three different phases of this vast project, and what the benefits will be for students and staff alike.

Following the success of our MVD (Medics Vets and Dentists) Programme, pages 6 and 7 take a look at two exciting new pathways introduced this year by Associate Director of Progression, Ellen Walkinshaw, namely Women in STEM (Science, Technology, Engineering and Maths) and Careers in Health.

We are once again running a series of Applicants' Events (both virtual and face-to-face), aimed at students who will be starting at the College in September 2022 (see www.reigate.ac.uk/applicant-events). Details of these are released as

the academic year progresses and invitations will be sent to anyone fulfilling the relevant criteria. We have 15 events in total, including two Summer Schools for Music and Performing Arts (see page 8).

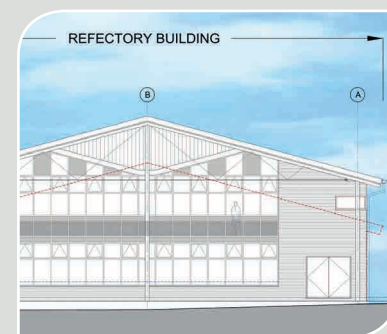

It was with much sadness, especially after witnessing the euphoria of students performing in our 'Rock out of Lockdown' concert on 24 November (see back cover) that I had to postpone our Winter Concert and Hot Feet Dance Show, both due to have taken place in December. The steep rise in Surrey-wide Covid cases unfortunately left me with little choice, but I'm optimistic we'll be able to rearrange them for next term.

Despite the postponement of our live shows, I'm delighted to see that our Music team is releasing a special Reigate College video version of Slade's 'Merry Christmas Everybody' – see www.reigate.ac.uk/news May I wish everyone in the College community and beyond, a very happy Christmas.

Success at the Maths Olympiad for Girls

On 7 October, four young women from Reigate College took part in The Maths Olympiad for Girls, organised by the UK Mathematics Trust www.ukmt.org.uk/mog

David Neumann, Course Leader for Further Maths, at the College explained, "The Maths Olympiad for Girls is open to girls and young women across the UK and requires them to get to grips with five challenging problems in an exam scenario. It's a great opportunity for them to extend their Maths knowledge and skills. The UKMT runs the competition as a way of encouraging more young women to continue studying Maths and Further Maths at A Level and beyond."

Nancy Roadnight

Isabelle Haywood

Lili Finch

Madison Brown

He went on, "Our top-scoring student was Nancy Roadnight who was awarded a Certificate of Distinction, with Isabelle Haywood, Lili Finch and Madison Brown each receiving a Certificate of Merit. I'd like to thank each of the girls for their commitment to the competition."

University Calling

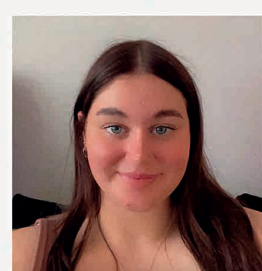

The College works hard to provide an environment in which all students can achieve at the highest level. One of the best indicators of the College's success in this area is 'Value Added'. Our students regularly do twice as well on their A Level (or equivalent) courses, than they are predicted to, using a comparison of nationally predicted grades, and average GCSE scores.

Here are a few examples of some of the 851 university success stories from last year's Upper Sixth.

Charlie Morrison: Laine Theatre Arts
Performing Arts

Charlie Morrison, who was previously at The Beacon School, achieved a Distinction/* in the BTEC Extended Diploma in Performing Arts (3 A Level equivalent) and is now studying Performing Arts at Laine Theatre Arts.

Madi Lang: Chichester University
Law with Criminology

Madi Lang, who was at Glenthorn High School, achieved three Distinction*s for her three BTEC courses in Law, Public Services and Sport and is now at Chichester University studying Law with Criminology.

Efan Fisher: University of Nottingham
Economics with Hispanic Studies

Efan Fisher, who was formerly at Reigate School, gained four A*s in Spanish, Economics, Chemistry and Physics and is now studying Economics with Hispanic Studies at the University of Nottingham.

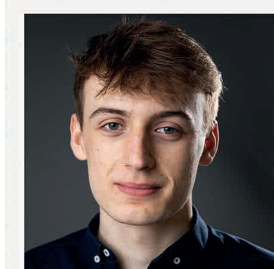

Oscar Picking: Performing Arts
Gap Year

Oscar Picking, who was also at Reigate School, achieved A*s in English Literature and Geography, an A in Psychology and a Distinction* in Performing Arts (Musical Theatre). He's now taking a Gap Year before heading to drama school to do a BA in Performing Arts.

Jennifer Stern: University of Leeds
Economics

Jenni Stern, who had been at Reigate Grammar School, gained three A*s in Economics, Art and Maths and took up a place to read Economics at the University of Leeds.

Carter Springall: University of Leeds
Computer Science

Carter Springall, who was previously at John Fisher School achieved three As in Further Maths, Maths and Computer Science and is now at the University of Leeds doing Computer Science.

India Brodie (not pictured), who was at Heathside School and gained an A* in Photography, an A in Sociology and a B in Psychology is currently doing Photography at Anglia Ruskin University.

careers >>
BULLETIN

Look out for information about summer placements and other opportunities in the weekly Careers Bulletin, which is emailed to all students and available on the College website.

Results Roundup

Oxford successes from left to right: Etienne, Jonas, Olivia, Jason and Candice.

In-line with previous years and despite the difficult backdrop of Covid, Reigate College students once again achieved some excellent results, with all but a handful of students securing places at their first-choice universities.

For A Level, 67.4% of students received high grades (A* to B), with a 99% pass rate.

For BTEC, 68% of students received high grades (Distinction*/Distinction) – a figure that is well above the national average. This is encouraging, since students are now required to sit externally assessed exams, bringing the BTEC courses even further in-line with A Levels.

Nick Clark, Principal of Reigate College commented, "I'm so proud of what our

Cambridge successes from left to right: Gregor, Riana, Shania and Edward

students achieved this summer. These are outstanding results, following a similar trajectory to previous cohorts, despite incredibly challenging circumstances."

"I would like to thank all our Upper Sixth leavers, together with their teachers and support staff for digging into their reserves of both resilience and determination to achieve the best possible outcomes."

All the College's Oxbridge and MVD offer-holders secured their places, with 10 students gaining places at either Oxford or Cambridge and 10 securing places to read Medicine or Veterinary Science.

Medicine and Veterinary Science:

Niamh Chavasse (Cardiff)
Hannah Craig (UCL)
Freja Forrest (UCL)
Gregor Fowler (Cambridge, Homerton College)
Fahmina Khan (Cardiff)
Sharon Pepple (Plymouth)
Livvy Walker (Bristol)
Amy Beattie (Bristol)
Amy Sanders (Bristol)

Not photographed: Taryn Cole (Left 2020, Surrey).

For the full breakdown of results for 2020/2021, see www.reigate.ac.uk/results

MVD successes from left to right: Livvy, Amy B, Freja, Fahmina, Amy S, Hannah, Niamh, Sharon, Gregor

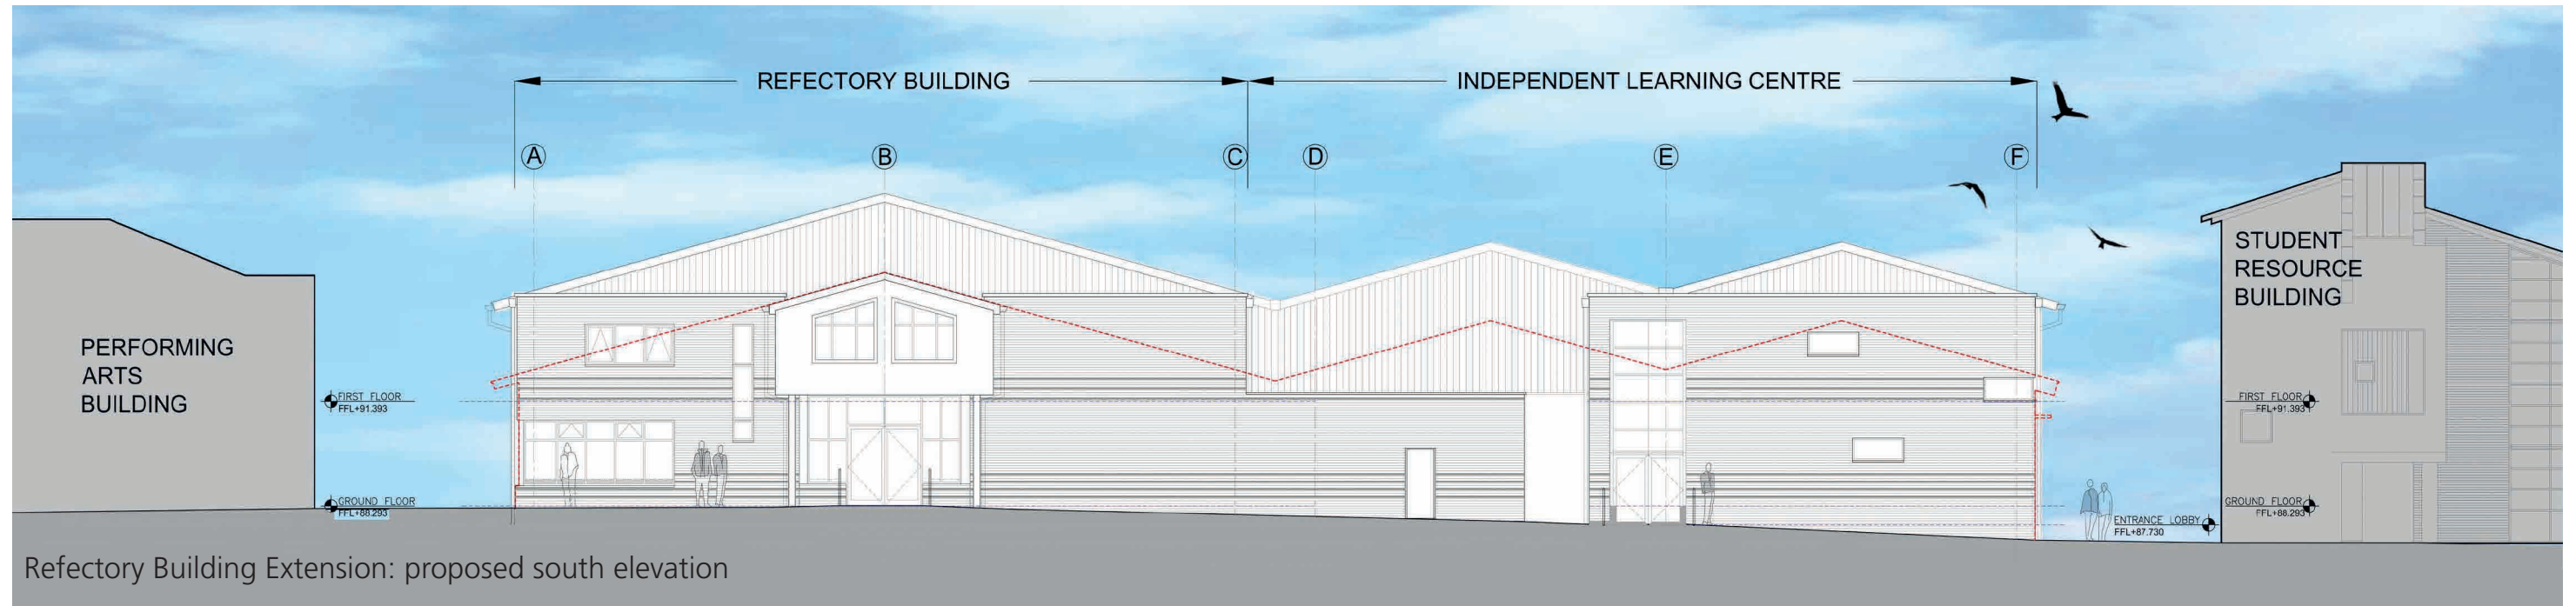

Oxford:

Etienne Baker (History and Politics, Pembroke)
Jonas Nohrurfft (Biology, Brasenose)
Olivia Hickman (Economics and Management, Hertford)
Jason Russell (Archaeology and Anthropology, St Hugh's)
Candice Holloway (Geography, St John's).

Cambridge:

Gregor Fowler (Medicine, Homerton)
Riana Islam (Economics, St. Catherine's)
Shania McNally (Human, Social and Political Science, Pembroke)
Edward Mehegan-Potter (Human, Social and Political Science, Trinity Hall)
Not photographed: Conal Lowe (Linguistics, Queen's).

Building for a Brighter Future

Refectory Building Extension: proposed south elevation

Garry Holmes (left) and Nick Clark

Director of Estates and IT, Garry Holmes talks to On Route about one of the biggest and most complicated building projects he's overseen, in his 35-year career at the College.

On Route: What does this latest building project involve and what are the anticipated timescales?

Garry Holmes: Studying, eating and socialising are always top of the importance list, for our students (not necessarily in that order!) and this project will result in dramatic improvements in all three areas. By early 2023, the project will be fully completed, and will result in:

- A state-of-the-art, two storey Independent Learning Centre (ILC) that

will be dedicated to silent, independent study, operating much like a library, but with the emphasis on access to digital resources. This will double the capacity of the current ILC.

- A welcoming, spacious, two-storey Refectory that will include a small servery on the first floor, as well as improved facilities on the ground floor, providing a fantastic space for students to socialise with their friends.

OR: How easy is it, keeping the College's facilities open and functioning normally during the build?

GH: Logistically it's a big challenge, as the College will be open for 'business as usual' during the project, so we've had to break the project into three discreet phases:

- Phase 1 is the extension of the current New Refectory (East Wing), to create a new ground floor entrance foyer, WCs and a lift, plus extra seating at the rear, together with the addition of a whole new first floor. By Easter 2022 we will be ready to open this building, with the first floor being used as an Independent Learning Centre, and the ground floor as temporary Refectory space.
- Phase 2 will start after Easter 2022 and will involve extending the old Refectory (West Wing) upwards, to create a second floor. Once complete, around December 2022, this building will become a two storey Refectory, with a small servery area on the first floor, and will vastly increase the current capacity.
- Finally, Phase 3 will start in January 2023 and will see the full completion

of both the new Independent Learning Centre and the new Refectory. At this point, the temporary huts and marquees will be taken down and removed from the site.

OR: What's the estimated cost of the project and how is it being paid for?

GH: It will be in the region of £3.5 million.

We made a bid for funding to the BCIF (Building Condition Improvement Fund) via the Department of Education and were successful in obtaining funding of just over £2 million. The rest is being funded through College reserves.

OR: What will be the benefit of the project be to students and staff?

GH: Put simply, massive amounts of extra space! The new ILC will be capable of accommodating over 300 students, for independent, silent study, while the Refectory improvements will result in less queues and more seating, making it a better social space.

OR: How does this project compare with previous ones in terms of workload and difficulties?

GH: Of all the projects I've been involved with at the College, this has been the most complicated.

A perfect storm of Covid, Brexit then the Suez Canal crisis have all played a part in further complicating matters. Building contractors have found it extremely difficult to put a price on the project because of the ever-increasing cost of building materials. Being able to obtain certain materials has been problematic in

some areas too, since a lot of materials are supplied from overseas. Despite this, it is all on course to be completed on time.

OR: Which other main building projects have you overseen at College?

GH: Since 1998, I have overseen the construction of:

- The Priory Building - 1998/9
- The Pavilion at our Wallfield playing fields - 2000

- The Visual Arts Centre - 2001
- Business Centre - 2002/3
- Dramatic Arts Centre - 2004/5
- The original 'New Refectory' - 2006/7
- Garden Building - 2007/8
- The East and West Wings - 2010
- The Sports Centre - 2011
- The Enhancement Centre - 2012/13
- Priory Building extension - 2015
- Addition of second floor to Dramatic Arts - 2017

OR: Who's in the current project team and how well does the team work together?

GH: The project team consists of myself, the College Finance Director and College Senior Leadership Team.

It's a really focused group. We've worked extremely well together, over a number of years. It helps that we're all united in the belief that having first-rate accommodation, that we can all be extremely proud of, is a key ingredient to our success as a College.

A typical project takes around a year before any building work starts on site, so it's a much longer process than most people realise.

Pathways to Success

Trailblazer Deborah Elenge, did both a Nuffield Research Placement and the Gold CREST Award, and is now studying Chemical Engineering at Loughborough University

Following the enormous success of the Medicine, Vets and Dentists (MVD) Pathway, which this year resulted in 9 Upper Sixth students securing places at either Medical or Dentistry Schools, two additional pathways have been added to the Aspire and Tutorial Programmes - 'Women in STEM' and 'Careers in Health'.

Women in STEM Pathway

The College's Women in STEM pathway is the mastermind of three members of staff: Associate Director of Progression Ellen Walkinshaw, Head of Chemistry Louise Harris and Deputy Head of Maths Simon King.

Simon King, spoke to On Route about the new pathway and why it's become such a focus for the College.

On Route: Where did the idea for a dedicated Women in STEM pathway come from?

Simon King: My colleagues and I, who teach in STEM fields (Science, Technology, Engineering and Maths) recognise there's a huge gender divide, in these subject areas, with vastly more boys opting to take STEM subjects (particularly Further Maths,

Physics and Computer Science) at A Level or university, than girls.

My trigger for taking action was my attendance at a seminar last June, on the topic of Women in STEM. It was through that, that I recognised we could and should do more at Reigate College to help make a positive change.

With the input and support of various STEM colleagues at the College, we agreed that creating a 'Women in STEM Pathway' allows us to provide a vital support network for the young women at College doing STEM subjects, that they could use to explore STEM careers, and gain vital input from inspiring women working in STEM fields.

OR: How and at what stage can students join the pathway?

SK: It's a very open and flexible group. Any student identifying as female, who is studying a STEM subject, can register their interest and then get involved in as many of the opportunities we have planned, as they want to. They just need to express their interest by emailing aspire@reigate.ac.uk

Aspire

ON: What sorts of things will you be offering?

SK: The plan is to meet as an additional tutorial group, at regular intervals, to explore specific topics including university courses, as well as apprenticeship and sponsored degree opportunities. We're also lining up external speaker events and Reigate College Alumni, for students to interview. Plus, we're also hoping to offer some trips.

OR: What are you hoping students will gain, by being part of this new pathway?

SK: The hope is that the young women attending the sessions and activities will feel more confident talking about STEM and be motivated to follow career options in STEM fields.

Although in its infancy, we're also hoping that the young women who engage with this group, will go on to offer their support to future Reigate College students.

Women in STEM Applicants' Event

As an additional push to encourage more girls to consider taking STEM subjects at A Level, and pursue careers in STEM fields, on 17 November the College ran its first Women in STEM, Year 11 Applicants' Event.

Aimed at female students who may be considering studying Physics, Maths, Further Maths, Engineering or Computer Science at the College, the event included talks by College staff and two external speakers, in addition to a Q&A with a panel of current female STEM students.

Our thanks to external speakers Holly Tovey, Senior Statistician at the Institute of Cancer Research and Katherine Chapman, Senior Product Security

Simon King with guest speakers Holly Tovey and Katherine Chapman

Engineer at BAE systems and the five students who made up the student panel.

Student panel: Mergi Aga, Angelina Else, Laura Grundy and Gemma Heinrich. Catherine Hogg, not photographed.

Women in STEM College Alumni

Ellen Walkinshaw, Associate Director (Progression) at the College, picked five Alumni as examples of the different directions Women in STEM can take. She said, "I hope our new Women in STEM Pathway will give more young women the confidence to pursue careers in a broad range of STEM areas."

Sophia Raccagna

Previous School: St. Philomenas

Left: 2021

Subjects: Computer Science, Engineering and Fashion & Textiles

Apprenticeship/Sponsored Degree: Cyber Security, University of Portsmouth

Jess Parker

Previous School: Reigate
Left: 2019

Subjects: Maths, Further Maths, Physics and Geography

Degree: Mechanical Engineering, Imperial College London

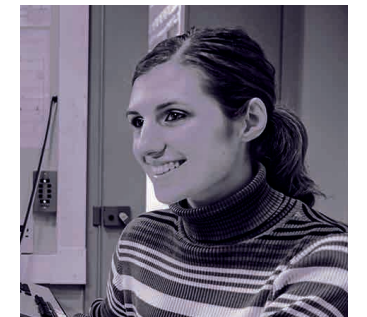

Deborah Elenge

Previous School: de Stafford
Left: 2020

Subjects: Chemistry, Physics, Maths and Spanish

Degree: Chemical Engineering, Loughborough University

Freya Turner

Previous School: Reigate
Left: 2018

Subjects: Maths, Physics, Music Technology

Degree: Music and Sound Recording, Surrey University (Tonmeister)

Lauren Payne

Previous School: St Bede's School

Left: 2021

Subjects: Maths, Physics and Product Design.

Degree: Product Design Engineering with placement, Brunel University

Careers in Health Pathway

All students (regardless of their average GCSE score) can apply for a place on the College's Careers in Health Pathway.

This second new pathway for 2021-2022, takes the form of dedicated tutorials, designed to help students research routes into health-related careers, such as nursing, midwifery, paramedic science and physiotherapy.

Students taking subjects such as Biology, Applied Human Biology or Health & Social Care, who are interested in finding out more about careers in health, can apply for a place by emailing aspire@reigate.ac.uk

Out and About with A Level Music

A Level Music students have been enjoying some welcome trips out, over the last couple of months.

On 14 October they attended the first day of a Composition Workshop Project at the Yehudi Menuhin School in Dorking, closely followed on 19 October by a trip to Glyndebourne, to see a performance of Fidelio, Beethoven's only opera.

The same group also attended a Music Analysis Conference at Queen Anne's School in Caversham, on 16 November.

Head of Music Kate Swan explained, "Attending these trips gives students the opportunity to immerse themselves in specific topics and benefit from the input of experts in their fields. The intention is for them to consolidate, refresh and extend their learning, outside the usual College environment."

Sizzling Summer Schools for Year 11s

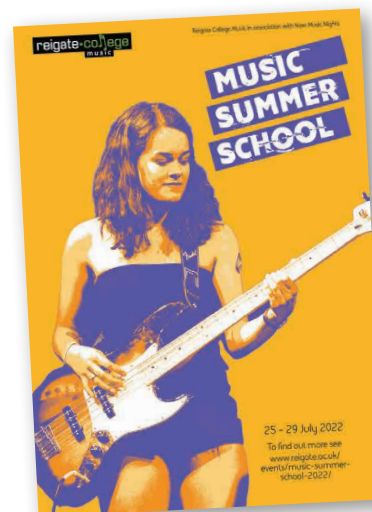

Following on the back of the success of previous Summer Schools, the College will be running two Summer Schools this summer:

Music Summer School

Monday 25 to Friday 29 July – 10am to 4pm
Holmesdale Music Centre, Reigate College. Cost £260

Nick Trepka, who runs the Music Summer School explained, "The Music Summer School gives budding song-writers, performers and producers, who are currently in Year 11, the chance to develop both their musical skills and confidence."

"It's particularly suited to students who are planning on doing A Level Music Technology, as it gives them the chance to try out our excellent facilities, and work on a collaborative album. Several of our former Music students, who are pursuing musical careers, come back to assist, which adds to the creative atmosphere."

Performing Arts Summer School

Tuesday 16 August to Thursday 18 August – 10am to 3pm
Dramatic Arts Centre, Reigate College. Cost £85

Zoe Dunkley, Head of Musical Theatre at the College, said, "The Performing Arts Summer School is a chance for both students and staff to spend a concentrated period of time immersing themselves in dramatic arts, without the distractions and pressures of a normal school or College week."

"With a different emphasis each day, participants will be able to join one of three groups and attend workshops on a carousel basis in script-writing, devising, and technique-based sessions in acting, movement and vocal skills."

For more information and to book see www.reigate.ac.uk/applicant-events
Both Summer Schools are aimed at students currently in Year 11 who've applied to do relevant subjects at the College from September 2022 (see website for details).

Shows and Concerts

Please check the Reigate College Box Office www.reigate.ac.uk/box-office for the latest dates for the College's shows and concerts.

Union Matters

It's been a busy start to the academic year for the Students' Union, with new SU representatives organising a succession of College charity and social events, with particular emphasis on restoring the College community, following the disruption caused by the pandemic. Here are some of the highlights so far:

Community Day

The SU welcomed new Lower Sixth and Intermediate students by helping to set up and run the College's Community Day on 21 September. The day gives students the chance to get to know members of their tutor groups, via a programme of fun and interactive team building activities.

Watch out for more pop-up community events next term and don't forget to 'like' Reigate College's Facebook and Instagram pages to see news and photos from these events.

Students' Union representatives 2021-2022:

| | |
|----------------------------------|--|
| Presidents | Christian Kelly, Emma Hourihan |
| Student Welfare Officers | James West, Rose Kemp |
| Equality Officers | Katie Steere, Rebecca Mulvey, Asma Issa |
| Community Events Officers | Joe Critchlow, Jamie Kirby, Lily Macpherson, Lucy Turner, Rebecca Arnold |
| Environmental Officers | Eve Gordon, Zoe Cordner |
| Communications Officers | Hugh Chapman Brown, Chloe Hedges |
| Wellbeing Ambassadors | Katie Mitchell, Phoebe Barnes, Jemima Farodoys, Isabel Raper |

Gratitude Week

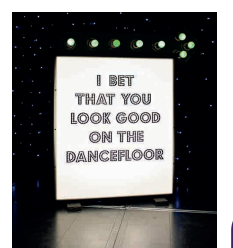

This term's community focus was Gratitude Week - from 6 to 10 December. This was a time for students to focus on what they were grateful for, and for the whole College community to come together to support a variety of charities.

For the fourth year running, Intermediate and Lower Sixth tutor groups were asked to put together gift bags for elderly members of a local Age Concern centre. While Upper Sixth students worked together to provide foodbank donations for the local charity Loveworks.

The College also arranged collections of children's clothing and stationery for the Wellingara Nursery School in the Gambia.

Freshers' Party

The College's new Lower Sixth danced the night away at this year's Neon-themed, Freshers' Party on Thursday 14 October. A Live DJ, photo booth, and neon face-paint station added to the excitement.

In the Spotlight

Alex Linscer

Levi Burke-Astorino

Alfie Prince

Liam Kew

Pippa Roessler, third from left

Meet five of the College's sporting elite

Alex Linscer

Previous School: Lingfield College

Subjects: BTEC Diploma in Sport (2 A Level equivalent) and BTEC in Digital Media Production

Alex has been selected to play for Surrey U18's in Rugby.

Future Plans: Alex's ultimate goal is to become a professional or semi-professional rugby player. He intends to get a degree in something sports-related so that if he doesn't make it as a professional player, he can still secure a career in Sport.

Levi Burke-Astorino

Previous School: Woodcote

Subjects: A Levels in Maths, Economics and PE

Levi has been selected by the British American Football Association (BAFA) for the GB National Team.

Future Plans: For the next 18 months Levi's sporting focus will be on the NFL Academy in North London, to see where he can take his American Football career. If it doesn't work out, he will take up a deferred university place to study Economics at Nottingham, Bristol, LSE or UCL, from September 2023.

Liam Kew

Previous School: Reigate

Subjects: A Level Biology, BTECs in Business and Digital Media Production

Liam recently won a gold medal, in a historic international win, in the Men's cadet Fencing Competition in Belgrade, Serbia.

The GBR team of Liam, Alec Brooke, Cador Beautyman and David Perkins pulled out an outstanding team performance to take the top place.

Future Plans: Liam is currently working towards the Fencing Euros and Worlds in March/April 2022 and is considering a career in the competitive gaming world eSports.

Alfie Prince

Previous School: Dunottar

Subjects: A Levels in Business and Sociology and a BTEC in Engineering

Alfie has been selected to take part in a scholarship day (worth £150,000) to win a fully financed race drive in the 2022 Ginetta British Sportscar Championship. The scholarship took place in Lincolnshire on 3 December 2021.

Future Plans: Alfie is making the transition from karts to cars with a view to building a professional career in Motor Racing.

Pippa Roessler

Previous School: St. Bede's

Subjects: A Levels in PE, Maths and Psychology

Pippa currently trains with top British coach Mick Woods at Aldershot Farnham and District Athletics Club, which is one of the best running clubs in the country. In 2021 Pippa represented Great Britain in the U20 3,000m track and field international competition held at Loughborough Univeristy.

Future Plans: Pippa has offers to study Psychology at Birmingham, Loughborough and Cardiff

Universities, all universities with high performance running programmes. Her preferred choice is St Mary's University in London, as they have an elite running programme that has produced many Olympians.

Despite having offers of full scholarships from American Universities, Pippa wants to remain in England for her undergraduate studies, so as to compete in the key English and UK championship events. She may choose to experience American culture and NCAA competition by doing a Masters degree in the US in the future.

Sports Round-up

Hockey

The Hockey team has been training most weeks, either at East Grinstead or in the Sports Hall. They are planning some friendly fixtures for after Christmas.

Women's Football

Excellent team spirit and great enthusiasm for playing post-Covid. Top performances to highlight so far this season include Abbie Cutler, Liv Burnside and goal scorers Alice Harper and Thea Ryder.

Men's 1st Team Football

The team is competing in the ESFA Super League, AOC Cup and Surrey Sixth Form League. With a little more consistency throughout games and fewer injuries to key players, the team can focus on its key aim for the season – the Surrey Sixth Form League title!

Men's 2nd Team Football

The boys have played extremely well, having won all their competitive fixtures in the first half term. An early season win over Godalming, coming back from 1-0 down at half-time to win 3-1, paved the way to further success including a 6-2 win over Chichester College in the AOC Cup, and a 8-2 win against Pulse Camberley in the League, with Charlie Gauntlett scoring 4.

Men's 3rd Team Football

A good season so far in the Surrey Colleges League and progression into the next round of the Surrey Colleges Cup. Notable wins have included a 5-1 win over Woking and a 3-1 win over Merrist Wood.

Men's Rugby

A great start to the season. A talented group of Rugby players who are enjoying an undefeated season to date and demonstrating fantastic team spirit.

Women's Rugby

The team has been training most weeks, including collaborative sessions with other sixth forms including Reigate Grammar and Tiffin school.

Duke of Edinburgh's Gold Award expedition to the Brecon Beacons

A massive well done to the 70 Upper Sixth students who completed their final Duke of Edinburgh's Gold Award expedition to the Brecon Beacons (South Wales) during October half term (22 to 26 October).

Camping by night in the cold (and sometimes wet!), and laden with heavy packs by day, they walked various routes around the Brecon Beacons, en route to the highest peak of Pen Y Fan.

For most, the expedition is the toughest part of the award, and they can now look forward to completing the other sections – volunteering, physical activity and skills – over the coming months.

In order to complete the Expedition section, students had to make a presentation about an aspect of their experience.

Students in the Lower Sixth are now preparing for their training weekend in March ready for their practice expedition back in the Brecon Beacons at Easter.

Diary Dates

From December 2021

| What | When |
|---|--|
| Last day of term for students (unless directed otherwise) | Tuesday 14 December |
| Start of Spring Term | Tuesday 4 January |
| Structured Learning Day | Thursday 20 January |
| February Half Term Holiday | Monday 14 to Friday 18 February (back Monday 21) |
| Structured Learning Day | Friday 25 February |

Music students playing at the 'Rock out of Lockdown' Concert on 24 November.
From left: Kalyan (sax), Ryan (guitar), Charlie (drums), Emily (singer) and Issy (bass).

Reigate College's Alumni is a professional network of over 2,500 former students who are studying or working in a wide range of areas.

Help us grow the network, so that together we can help inspire and support current students.
